# Helpful tips

Here are some tips to keep in mind when fitting and using the Amara View sleep therapy mask.

Unlike most full face masks, the cushion size for Amara View is determined by measuring the depth of the nose using the simple sizing gauge.

Just place the sizing gauge under your nose **without pushing against the cheeks** and the tip of the nose will indicate whether they need a small, medium or large cushion size. **If you measure close to the threshold always choose the smaller size.**

# Fitting instructions

1 Loosen the headgear. Twist the headgear clips to disconnect.

5 Press the headgear clips into place to connect.

2 Choose the cushion size that covers the mouth and sits at the nose base.

6 Pull back the headgear tabs to evenly adjust the top and bottom straps.

3 Gently holding the mask against the face, pull the headgear over the head.

7 Adjust the crown strap so the headgear sits loosely and comfortably.

4 Ensure the nose is over **(not inside)** the cushion nostril opening.

8 Connect to a working CPAP machine to make final adjustments.
